

# COMMERCIAL LIGHTING DEVICES

**BALLAST BYPASS**

## LED Type B T5

LED compatible replacement for linear fixtures that operate independently of ballasts.

Limitless Options  
for the following applications:

- Offices
- Restaurants
- Retail Stores
- Lobbies
- Schools
- Hospitals

RECOGNIZED  
COMPONENT

5 YEAR  
WARRANTY

CONFORMS TO NSF STD. 2

we know light.™

# LED LiberaT5™ Tubes

## Features and Benefits

>40% energy savings
Long life: 50,000
Bypass Application: 120-277 line voltage
Instant on/off
Non-flickering
Single End Construction
Highly durable SHATTERPROOF plastic (4, 3 and 2 foot tubes)
UL rated for enclosed fixtures
No energy losses due to fluorescent ballast

## Specifications

Base Types: G5
Construction: Single ended
Wattage: 9w, 12w, 13w, 16w, 25w
Minimum starting temperature range: -22F / -30C
Safety: UL Classified
Environment: Damp/dry locations
Enclosed: Suitable for enclosed luminaires
Rated life: L70 50,000+ hours
Beam Angle: 4, 3 & 2 foot 180°
Field Angle: 4, 3 & 2 foot 280°
Non-shunted lampholders

Inspect lamp holders, ballast, and wiring to ensure these lamp holders are NON SHUNTED LAMP HOLDERS. TCP LiberaT5 Series lamps do not require a ballast to operate. They have an internal LED driver that operates on 120-277V. These tubes require power to only one end of the fixture, called the “power” side. The TCP LiberaT5 lamp is clearly marked at one end to signify power end. This must be installed in “power” end. The lamp holders (or tombstones) must be non-shunted as the power flows through the LED T5 tube. (Shunt means “an electrical conductor joining two points of a circuit, through which more or less of a current may be diverted”). Both “power” end and opposite end must both have unshunted tombstones. The “opposite” end acts as simply a mechanical holder with TCP LED LiberaT5 lamps.
